Customer Reviews

I recently started collecting die cast vehicles so the primary reason I was interested in this book was to know just what's out there. This book mostly covers the real old stuff, there's only a brief coverage of the post Lesney produced vehicles. Maybe collectors like Larson are mainly interested in the old stuff of their youth and this certainly would be a great little flick through book (it's not small enough in size to fit in even the pocket of the most obese sized person's clothing) for collectors of that era but a lot of us younger "newbies" are also interested in the newer stuff too. This book is published in 2008 so there really is no excuse for at least a good sample of vehicles up to 2007 not being here. Every Matchbox car I own is not listed in here.I'm more into the entertainment themed vehicles myself and I was really interested to know what other Character Cars were manufactured

besides the ones I've come across. I've stumbled across a few different Matchbox vehicles marketing various movies and wondered if Matchbox has a range that rivals what Johnny Lightning has out there. I am familiar with the Star Cars but whenever you come across there on an online site they are still in the blister pack and I would have like to have been able to see what they look like loose to see how close resemble actual vehicle in show/movie. I really just wanted a guide that shows a wide selection of what's out there (I realise a complete guide is all but impossible). This book holds none of those answers that those like myself interested in later vehicles are after. This book does have very nice photographs of the small number of vehicles it does cover.
